
protein−DNA complex
postsynaptic density membrane
collagenous component of interstitial matrix
stress fiber
nuclear lamina
serine/threonine protein kinase complex
T−tubule
platelet alpha granule
peroxisomal matrix
kinesin complex
9+2 motile cilium
sno(s)RNA−containing ribonucleoprotein complex
non−collagenous component of interstitial matrix
90S preribosome
spliceosomal snRNP complex
organellar ribosome
proteasome complex
anaphase−promoting complex
intermediate filament cytoskeleton
nuclear replication fork
outer mitochondrial membrane protein complex
cleavage furrow
mitochondrial intermembrane space
dynein complex
dendritic tree
external encapsulating structure
condensed chromosome, centromeric region
CMG complex
sarcomere
sarcoplasmic reticulum
solid phase of basement membrane
heterochromatin
cytoplasmic vesicle lumen
ficolin−1−rich granule lumen
gel phase of interstitial matrix
primary lysosome
apical plasma membrane
